

PhD Fellowships in Environmental Science Available for Fall 2018!
USDA National Needs Fellowship in Interdisciplinary Forest Resources

The Department of Forestry at Michigan State University (MSU) is recruiting outstanding applicants for a new, interdisciplinary PhD training program. Fellowships are available to support students committed to integrating perspectives from multiple disciplines to address emerging ecological, social, economic and technological challenges in environmental science and natural resource management. We seek to build a diverse cohort of incoming fellows and strongly encourage applicants from groups traditionally underrepresented in environmental and natural resource sciences including women and African- Hispanic-, Native-, and Asian-Americans.

Successful applicants will participate in a new interdisciplinary training program that includes:

- Cutting-edge research methods to address complex, multidisciplinary environmental problems
- Practice in effective communication with practitioners, policymakers, industry and the broader public.
- Professional development and leadership training
- Networking and communication skills development
- Engagement with internationally-recognized faculty, representing multiple disciplinary approaches to environmental science

The Department of Forestry at MSU is a vibrant, growing, internationally-recognized unit firmly committed to interdisciplinary education, research, and extension to understand and resolve environmental and natural resource issues. MSU is a large, diverse research institution with state of the art library and research facilities. Fellows in this program can learn from hundreds of faculty conducting teaching and research in environmental sciences across 12 colleges and 40 departments. The campus is located in the city of East Lansing, adjacent to the capital city of Lansing. The Lansing metropolitan area has a diverse population of approximately 450,000.

More Information and Application Instructions

Please visit the program website at <http://www.canr.msu.edu/nnf/> for more information and application instructions, or contact the Program Director David Rothstein at rothste2@msu.edu or 517-432-3353.
